RE: Feedback and appreciation

END OF YEAR REPORT AND UPDATE ON SCHOOL SPONSORSHIP PROGRAMME.

Almost gone is 2015 and here we come 2016! I am glad that 2015 went well for us as an organization mainly because of everything we were able to complete. In this year, we have been able to:-

- ✓ Sustain the school sponsorship programme.

For all the above success, we are happy and glad the organization is taking firm strides forward for the better and creating impact.

As we glance to yet another inevitable year, I am positive for even better accomplishments.

School Sponsorship.

All our students are currently on holiday and I can gladly say, all passed well and were awarded certificates of Directorate of industrial training by the minister of higher Education in Uganda and are awaiting results of the theory part to be released by the Uganda National Examination Board and Nakayondo Lillian promoted to senior four for next year.

Farouk receiving a certificate from the minister

Jubilating with classmets

In accordance with the information above therefore, we begin the New Year with one (1) continuing student on the programme as others (6 of them) have completed their Directorate of Industrial Training Certificate.

Our humble request is still towards adding more five students on the programme to replace those who have finished majorly because there is quite a number of needy and orphaned students whose future is bleak and uncertain because they lack the funds and resources to go to school and we are hoping for a positive feedback.

Next term begins in early February. It's for that reason I have attached previous term's **(2nd and 3rd term of 2015)** budget to this report early to give ample time to that effect.

Otherwise we are hopeful about this year and looking forward to it as we progress steadily!

Regards from NACMU Family
